

Brochure on the three Conventions

Friday, 25 January 2008

The information brochure on the Hazardous Chemicals and Wastes Conventions contains a brief non-technical overview of the three Conventions (Rotterdam Convention, Stockholm Convention and Basel Convention), how they complement each other and where they are different. The brochure is available in English, French and Spanish. Together the Basel, Rotterdam and Stockholm Conventions cover key elements of “cradle-to-grave” management of hazardous chemicals, most comprehensively in the case of POPs, which are covered by all three treaties.
